

ADAP

APPLIED DATA ANALYSIS PROGRAM

"Data analysis is not about tools alone, but about thinking, interpretation, and decision impact."

ABOUT IPACE DATA ACADEMY

iPace Data Academy is a premier virtual-first EdTech institution and a core pillar of iPace Concepts. Operating on a rigorous university model, the academy is dedicated to building a global talent pipeline of data-literate, research-grounded, and industry-ready professionals. By aligning education, mentorship, and institutional credibility, we provide an ecosystem where analytical maturity meets real-world application.

Vision

To become one of the world's most credible data academies and the primary feeder institution into the iPace Research Institute, setting a global benchmark for methodological discipline.

Mission

To deliver an admission-based, mentorship-driven, and outcome-verified education that transforms ambitious learners into elite data practitioners through rigorous academic workflows and applied research integration.

ABOUT THE ADAP PROGRAMME

The Applied Data Analysis Program (ADAP) is designed for learners who want to analyze, interpret, and communicate data for business, policy, and decision-making. The program focuses on practical data analysis workflows, business-oriented thinking, strong foundations in statistics, dashboarding and storytelling, and real-world datasets.

CAPSTONE PROJECT

Career Roles This Programme Prepares You For

Data Analyst

Business Intelligence Analyst

Reporting Analyst

Analytics Consultant

PHILOSOPHY OF THE PROGRAMME

"Data analysis is not about tools alone, but about thinking, interpretation, and decision impact."

ADAP is built on the philosophy that data analysis is not about tools alone — it is about thinking, interpretation, and decision impact. The program emphasizes understanding data before analyzing it, interpreting results beyond charts, communicating insights clearly to non-technical audiences, and applying analytics to real-world business problems.

AIMS & OBJECTIVES

By the end of this programme, you will be able to:

- Apply statistical reasoning to real datasets
- Clean, prepare, and structure raw data for analysis
- Analyze data using Excel and Python
- Design dashboards using Power BI and Tableau
- Communicate insights through visuals and reports
- Work independently on applied data projects

ENTRY REQUIREMENTS

Applicants should meet at least one of the following criteria:

- Undergraduate or graduate student (any discipline)
- Graduate or working professional seeking data skills
- Basic computer literacy required
- Willingness to learn and commit time
- No prior coding experience is required

iPACE Data Academy welcomes motivated learners from all backgrounds. What matters most is your commitment, curiosity, and willingness to grow.

GRADUATION REQUIREMENTS

To be awarded the iPACE Data Academy Certificate, learners must:

- Attend at least 50% of live sessions
- Complete all required assessments
- Submit and defend a capstone project
- Demonstrate applied data analysis competence

Assessment Structure

Assessment	When	Coverage
Assessment 1	End of Month 1 (May)	Foundation — Statistics & early course concepts
Assessment 2	End of Month 2 (Aug)	Core coursework — tools, methods, analysis
Assessment 3	Pre-Capstone (Aug)	Full programme readiness — all courses
Capstone Defence	Final Phase (Sep)	End-to-end project demonstrating competence

PROGRAMME OVERVIEW & COURSE STRUCTURE

The programme progresses from foundational theory through core skills to advanced tools and a capstone project. All three iPACE programmes share the Statistics General Course in Month 1.

Course	Category	Duration	When
Statistics — General Course (Cross-Programme)	Core Theory	3 Weeks	Month 1
Data Cleaning & Preparation with Excel	Short Modular	3 Weeks	Month 1
Excel for Data Analysis	Core Skill	Across 4 Months	M1 – M4
EDA with Python	Advanced Tool	9 Sessions	M2 – M4
Power BI for Data Visualization	Advanced Tool	2 Weeks	Month 4
Tableau for Dashboard Design	Advanced Tool	5 Weeks	M3 – M4
Digital & Data Thinking	Seminar	1 Day	Week 1
Ethical Use of AI	Seminar	1 Day	Month 1
Data Visualization & Interpretation	Seminar	2 Days	Post-Break

DELIVERY & PROGRAMME INFORMATION

Delivery Format	Live virtual classes — interactive & practical
Class Days	Thursday to Sunday (evening sessions, WAT)
Duration	4 months teaching + capstone & defence phase
Mode	100% virtual via structured academy platform
Mentorship	One-on-one project supervision with programme faculty
Assessment	Programme-based — 3 assessments + capstone defence

HEAD OF PROGRAMME & FACULTY

Muiz

Head of Program — Applied Data Analysis

A dedicated academic and practitioner committed to delivering rigorous, application-focused education at iPACE Data Academy.

Our Faculty

All iPACE Data Academy instructors are selected based on academic competence, industry experience, and teaching ability. Our faculty brings together practitioners and researchers who have worked with real data across business, academia, and technology. Every session combines theoretical grounding with practical application.

Faculty roles include core instructors, guest industry facilitators, research mentors, and capstone supervisors — ensuring learners receive both technical depth and professional exposure.

Ready to begin your data journey? Apply now at www.ipacedataacademy.ng or reach out to our admissions team to learn more about the 2026 Pilot Cohort.
