

RDAP

# RESEARCH DATA ANALYSIS PROGRAM

*"Good research begins with sound thinking, not software."*

ABOUT IPACE DATA ACADEMY

iPace Data Academy is a premier virtual-first EdTech institution and a core pillar of iPace Concepts. Operating on a rigorous university model, the academy is dedicated to building a global talent pipeline of data-literate, research-grounded, and industry-ready professionals. By aligning education, mentorship, and institutional credibility, we provide an ecosystem where analytical maturity meets real-world application.

Vision

To become one of the world's most credible data academies and the primary feeder institution into the iPace Research Institute, setting a global benchmark for methodological discipline.

Mission

To deliver an admission-based, mentorship-driven, and outcome-verified education that transforms ambitious learners into elite data practitioners through rigorous academic workflows and applied research integration.

ABOUT THE RDAP PROGRAMME

The Research Data Analysis Program (RDAP) is designed for individuals involved in academic, policy, institutional, and applied research who require strong analytical and methodological skills. RDAP emphasizes statistical reasoning, research design, data analysis using SPSS and R, academic writing, and reproducible ethical research.

RESEARCH DEFENCE

Career Roles This Programme Prepares You For

Undergraduate & Postgraduate Students

Researchers & Research Assistants

Academics & Policy Analysts

NGO & Development Practitioners

## PHILOSOPHY OF THE PROGRAMME

*"Good research begins with sound thinking, not software."*

RDAP is built on the philosophy that good research begins with sound thinking, not software. The program prioritizes methodology before tools, interpretation over computation, research integrity and ethics, and clear and defensible analytical decisions. Learners are trained to think like researchers, not just data users.

## AIMS & OBJECTIVES

By the end of this programme, you will be able to:

- Apply statistical methods to research problems
- Design and evaluate research studies
- Analyze research data using SPSS and R
- Interpret statistical results correctly
- Write and present research findings professionally
- Conduct end-to-end data-driven research

ENTRY REQUIREMENTS

Applicants should meet at least one of the following criteria:

- Undergraduate or postgraduate student
- Graduate involved in research or policy work
- Academic staff or research assistant
- Basic statistical literacy is an advantage
- No advanced programming experience is required

*iPACE Data Academy welcomes motivated learners from all backgrounds. What matters most is your commitment, curiosity, and willingness to grow.*

GRADUATION REQUIREMENTS

To be awarded the iPACE Data Academy Certificate, learners must:

- Attend at least 50% of live classes
- Complete all course assessments
- Submit and defend a capstone research project
- Demonstrate sound research and analytical competence

Assessment Structure

| Assessment       | When                 | Coverage                                        |
|------------------|----------------------|-------------------------------------------------|
| Assessment 1     | End of Month 1 (May) | Foundation — Statistics & early course concepts |
| Assessment 2     | End of Month 2 (Aug) | Core coursework — tools, methods, analysis      |
| Assessment 3     | Pre-Capstone (Aug)   | Full programme readiness — all courses          |
| Capstone Defence | Final Phase (Sep)    | End-to-end project demonstrating competence     |

PROGRAMME OVERVIEW & COURSE STRUCTURE

The programme progresses from foundational theory through core skills to advanced tools and a capstone project. All three iPACE programmes share the Statistics General Course in Month 1.

| Course                                        | Category      | Duration        | When       |
|-----------------------------------------------|---------------|-----------------|------------|
| Statistics — General Course (Cross-Programme) | Core Theory   | 3 Weeks         | Month 1    |
| Research Methods & Design                     | Short Modular | 2 Weeks         | Month 1    |
| Research Writing & Presentation               | Short Modular | 1 Week          | Month 1    |
| SPSS for Research Data Analysis               | Core Skill    | Across 4 Months | M1 – M4    |
| Introduction to R for Research                | Advanced Tool | 2 Weeks         | Month 4    |
| Digital & Data Thinking                       | Seminar       | 1 Day           | Week 1     |
| Ethical Use of AI in Research                 | Seminar       | 1 Day           | Month 1    |
| Data Visualization & Interpretation           | Seminar       | 2 Days          | Post-Break |

DELIVERY & PROGRAMME INFORMATION

|                 |                                                    |
|-----------------|----------------------------------------------------|
| Delivery Format | Live virtual lectures & practical data sessions    |
| Class Days      | Thursday to Sunday (evening sessions, WAT)         |
| Duration        | 4 months teaching + capstone & defence phase       |
| Mode            | 100% virtual via structured academy platform       |
| Mentorship      | Mentorship-guided research project supervision     |
| Assessment      | Programme-based — 3 assessments + capstone defence |

## HEAD OF PROGRAMME & FACULTY

### Ridwan

Head of Program — Research Data Analysis

A dedicated academic and practitioner committed to delivering rigorous, application-focused education at iPACE Data Academy.

### Our Faculty

All iPACE Data Academy instructors are selected based on academic competence, industry experience, and teaching ability. Our faculty brings together practitioners and researchers who have worked with real data across business, academia, and technology. Every session combines theoretical grounding with practical application.

Faculty roles include core instructors, guest industry facilitators, research mentors, and capstone supervisors — ensuring learners receive both technical depth and professional exposure.

**Ready to begin your data journey? Apply now at [www.ipacedataacademy.ng](http://www.ipacedataacademy.ng) or reach out to our admissions team to learn more about the 2026 Pilot Cohort.**
